Art Unit: 1724

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-13 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The term "intended for" (claims 14-26) is vague and indefinite, since it is not clear whether Applicant is attempting to positively recite using the purified water in its "intended" manner.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6-8 and 11-13 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Mehkeri et al.

(U.S. Patent No. 5,512,491). See col. 3, lines 7-20; col. 6, lines 26-28; col. 7, lines 37-38; and col. 11, lines 9-12.

Serial Number: 09/646,347 Page 3

Art Unit: 1724

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-5, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mehkeri et al. The reference discloses the claimed invention with the exception of the surface density of Al-OH groups on the alumina (claims 3-5) and the particle size of this alumina (claims 9 and 10). However, the exact surface density of Al-OH groups on the alumina employed in Mehkeri et al. (see col. 3, line 11), and the exact particle size of this alumina are not seen to materially affect the overall results of the reference process, or to produce any new and unexpected result; and are therefore deemed to be obvious matters of choice, which are insufficient to patentably distinguish the claims.

Applicant's arguments filed April 11, 2002 have been noted and carefully considered, but no longer appear to be relevant in view of the new grounds of rejection.

Farrah (U.S. Patent No. 5,432,077) and Everhart et al. (U.S. Patent No. 5,855,788) disclose similar materials for removing

protozoa from water (see col. 5, lines 11-14 and col. 13, lines 21-25 of Farrah; and col. 2, line 44; col. 6, line 18; col. 18, lines 50-51; and col. 26, lines 20-59 of Everhart et al).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can normally be reached on Monday through Friday from 8:30 AM to 5:00

The fax phone numbers for this art unit are: (703) 872-9311 for "Official" faxes after Final Rejection; (703) 872-9310 for all other "Official" faxes; and (703) 872-9492 for "Draft" and other "Unofficial" faxes.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
